	Over three billion miles driven cumulatively on FSD (Supervised) ⁴ as of January
	Completed construction of Megafactory Shanghai

SUMMARY

Q4 was a record quarter for both vehicle deliveries and energy storage deployments. We expect Model Y to once again be the best-selling vehicle, of any kind, globally for the full year 2024, and we have made it even better, with the New Model Y now launched in all markets. In 2024, we made significant investments in infrastructure that will spur the next wave of growth for the company, including vehicle manufacturing capabilities for new models, AI training compute and energy storage manufacturing capacity.

Affordability remains top of mind for customers, and we continue to review every aspect of our cost of goods sold (COGS) per vehicle⁵ to help alleviate this concern. In Q4, COGS per vehicle reached its lowest level ever at <\$35,000, driven largely by raw material cost improvement, helping us to partially offset our investment in compelling financing and lease options.

The Energy business achieved another record in Q4 with its highest-ever gross profit generation. Construction of Megafactory Shanghai was completed in December and will begin ramping this quarter. Powerwall deployments achieved another record quarter as we continue to ramp Powerwall 3 production and launch in additional markets.

2025 will be a seminal year in Tesla's history as FSD (Supervised) continues to rapidly improve with the aim of ultimately exceeding human levels of safety. This will eventually unlock an unsupervised FSD option for our customers and the Robotaxi business, which we expect to begin launching later this year in parts of the U.S. We also continue to work on launching FSD (Supervised) in Europe and China in 2025.

⁽¹⁾ Excludes SBC (stock-based compensation), net of tax; ⁽²⁾ Free cash flow = operating cash flow less capex; ⁽³⁾ Includes cash, cash equivalents and investments; ⁽⁴⁾ Active driver supervision required; does not make the vehicle autonomous; ⁽⁵⁾ Calculated by dividing Cost of Automotive Sales Revenue by respective quarter's new deliveries (ex-operating leases)

FINANCIAL SUMMARY

Revenue

Total revenue increased 2% YoY in Q4 to \$25.7B. YoY, revenue was impacted by the following items:

- + growth in Energy Generation and Storage and Services and Other
- + growth in vehicle deliveries
- + higher regulatory credit revenue
- reduced S3XY vehicle average selling price (ASP) (excl. FX impact¹), due to pricing, attractive financing options and mix

Profitability

Our operating income decreased 23% YoY to \$1.6B in Q4, resulting in a 6.2% operating margin. YoY, operating income was primarily impacted by the following items:

- reduced S3XY vehicle ASP
- increase in operating expenses driven by AI and other R&D projects
- + growth in Energy Generation and Storage and Services and Other gross profit
- + lower cost per vehicle, including lower raw material costs partially offset by lower fixed cost absorption from production decrease YoY
- + higher regulatory credit revenue

Cash

Quarter-end cash, cash equivalents and investments in Q4 was \$36.6B. The sequential increase of \$2.9B was primarily the result of positive free cash flow of \$2.0B.

¹ Impact is calculated on a constant currency basis. Actuals are compared against current results converted into USD using average exchange rates from Q4'23.

VEHICLE CAPACITY

Preparations are underway across our existing factories for the launch of new products in 2025, including more affordable models. New Model Y has launched on the configurator globally with production ramp and deliveries beginning later in Q1.

US: California, Nevada and Texas

Semi Factory construction continued in Q4 and recently completed roof and wall enclosure of the main building area. First truck builds are scheduled to start by end of 2025 with ramp beginning in early 2026. Preparation is underway for Cybercab lines at Gigafactory Texas with volume production planned for 2026.

Given its unique functionality – including Powershare, stainless steel exterior, enhanced durability and bioweapon defense mode – we deployed a fleet of Cybertrucks equipped with Starlink in the Los Angeles area to help first responders and those impacted by the fires get access to electricity and Wi-Fi. We expect Cybertruck to be eligible for the IRA consumer tax credit, helping to improve affordability and access for even more customers.

APAC: Shanghai

In Q4, we achieved record deliveries in China as Model Y became the best-selling vehicle for the full year. Tesla also became the fastest growing brand in South Korea, and we launched vehicle sales in the Philippines.

Europe: Berlin-Brandenburg

In 2024, Model Y was the best-selling vehicle of any type in Denmark, Norway, Sweden, Switzerland and the Netherlands and we expect Model Y to have been the second best-selling vehicle of any type in Europe. Tesla was the most sold brand in Norway for the fourth year in a row with Model Y and Model 3 the best- and second-best selling cars of any type in 2024.

Current Installed Annual Vehicle Capacity

Region	Model	Capacity	Status
California	Model S / Model X	100,000	Production
	Model 3 / Model Y	>550,000	Production
Shanghai	Model 3 / Model Y	>950,000	Production
Berlin	Model Y	>375,000	Production
Texas	Model Y	>250,000	Production
	Cybertruck	>125,000	Production
	Cybercab	-	In development
Nevada	Tesla Semi	-	Pilot production
TBD	Roadster	-	In development

Installed capacity ≠ current production rate and there may be limitations discovered as production rates approach capacity. Production rates depend on a variety of factors, including equipment uptime, component supply, downtime related to factory upgrades, regulatory considerations and other factors.
